Question 1: What were the main causes of the Cold War?

Answer:

The main causes of the Cold War include ideological differences between capitalism and communism, the power vacuum after World War II, mutual distrust between the United States and

the Soviet Union, and conflicting national interests. The division of Germany and Berlin, the arms race, and differing visions for global influence fueled tensions, ultimately leading to a prolonged period of hostility without direct military confrontation.

Question 2: Describe the process of decolonization in Africa after World War II.

Answer:

Decolonization in Africa was driven by nationalist movements seeking independence from European colonial powers. Factors included the weakening of European nations post-war, the rise of pan-Africanism, and international pressure for self-determination. Countries like Ghana, Algeria, and Kenya gained independence through negotiations or conflicts. This process led to the redrawing of political boundaries and the emergence of new nation-states, although often accompanied by challenges such as political instability and economic dependency.

Question 3: Explain the significance of the Space Race in the context of Cold War competition.

Answer:

The Space Race was a symbolic and technological competition between the United States and the Soviet Union. It demonstrated technological superiority and ideological dominance. The Soviet Union's launch of Sputnik in 1957 marked the beginning, followed by the U.S. Apollo Moon landing in 1969, which established American technological leadership.
